

# YESWANTH NAGA HARISH PERNI

[yeswanthnagaharish.perni@gmail.com](mailto:yeswanthnagaharish.perni@gmail.com) | 3096218996 | Peoria, IL | [Linkedin](#)

## PROFESSIONAL SUMMARY

Experienced Data Analyst with over **3** years of hands-on experience, proficient in extracting insights from complex datasets to drive informed decision-making. Skilled in Data Visualization, Statistical Analysis, Machine Learning, Predictive Modeling, and using Python, SQL, Power BI, Snowflake, and Tableau.

Demonstrated ability to translate business requirements into actionable data solutions, leading the implementation of new data analysis systems resulting in a **15%** increase in sales revenue and **20%** increase in data accuracy. Adept in collaborating with cross-functional teams, delivering projects on-time and on-budget.

## EDUCATION

Bradley University  
Computer Science | Master of Science  
GPA: 3.75

Peoria, USA  
Aug 2022 - May 2024

Vellore Institute of Technology  
Electronics and Communication | Bachelor of Technology  
GPA: 3.67

Chennai, India  
Jun 2017 - May 2021

## EXPERIENCE

### Urology Austin | Data Analyst

Peoria, IL | Feb 2025 – Present

- Revamped SharePoint site architecture to enhance user experience, improve navigation, and ensure easy access to critical resources.
- Automated a reminder system using **Power Automate**, sending monthly email notifications to **15+** site content managers, ensuring timely updates and content relevance.
- Optimized storage and cost efficiency by identifying and deleting **20+** obsolete SharePoint sites, reducing storage usage by **15%** and saving on operational costs.
- Redesigned the main **SharePoint** site and created wireframes for **5+** departmental sites, ensuring a consistent, user-friendly interface.
- Enhanced data governance by developing a SharePoint-based repository for Power BI reports and **RLS** policies, improving accessibility and compliance across enterprise teams.
- Conducted requirement gathering sessions with **10+** managers from different teams to understand business needs and implement effective SharePoint solutions.

### Caterpillar | Data Analyst

Peoria, IL | Aug 2024 – Dec 2024

- Leveraged **Snowflake** to build scalable ETL pipelines, integrating data from multiple sources for Power BI reporting, enhancing data availability and reducing query execution time by **30%**.
- Automated data validation in Snowflake by implementing **SQL** logic to flag validated records and integrating a checkbox indicator to the data, allowing users to easily verify data accuracy in real-time.
- Leveraged **Alation** as a data catalog and governance tool to document data lineage, business definitions, and ownership, strengthening compliance and improving report accuracy across Power BI dashboards.
- Designed the Data Governance **SharePoint** page, centralizing data policies, guidelines, and resources to improve accessibility, collaboration, and compliance with governance standards across teams.
- Contributed to the Customer360 project by creating CCIDs to obsolete and inactive records, enhancing data tracking, improving database integrity, and enabling more accurate customer profiling and reporting.
- Manually validated customer data from Caterpillar Financial, enhancing data accuracy and consistency, which improved the performance of machine learning models by **20%**, resulting in more reliable prediction.
- Utilized **Power Query** to transform and clean large datasets from Snowflake, streamlining ETL processes and enabling automated, real-time report generation in Power BI, reducing data preparation time by 20%.
- Debugged and optimized **Streamlit** and **Power BI** dashboards that tracks team performance metrics daily and weekly.
- Enabled subdomain-level governance evidence by integrating Snowflake schema changes into Alation, ensuring business stakeholders could validate and certify critical datasets.
- Partnered with data stewards and governance teams through Alation to establish standardized metadata practices, improving trust and adoption of Power BI reports across global teams.

### Illinois Mutual | SharePoint Data Analyst Intern

Peoria, Illinois | Jan 2024 – May 2024

- Presented analysis findings and insights to stakeholders through clear and concise reports, presentations, and data visualizations, facilitating understanding and decision-making.
- Developed and optimized DAX expressions for Power BI reports, creating measures for KPIs such as sales trends, customer retention, and operational efficiency, improving report performance by 15%.
- Utilized SQL for data extraction and transformation, resulting in a **20%** increase in Insurance product pricing data accuracy, saving approximately **\$25,000** annually, and enhancing overall data integrity.

- Developed predictive model using decision trees and random forests to accurately forecast customer churn, enhancing accuracy by **14%** compared to previous models, thereby optimizing retention strategies.
- Developed a Python script to automate the generation of reports for mainframe codes, enhancing efficiency and accuracy in tracking and analyzing mainframe code categories.
- Actively participated in Agile methodologies, contributing to sprint planning, daily stand-ups, and sprint retrospectives to drive iterative solution delivery and ensure project success in dynamic team settings.
- Conducted requirement gathering sessions and collaborated with stakeholders to understand business needs, resulting in a **20%** increase in project efficiency.

#### **Cognizant Technology Solutions | Data Analyst**

**Pune, India | Jan 2021 - Jul 2022**

- Applied data analysis techniques across diverse industries, including healthcare, retail, and finance, demonstrating adaptability and domain expertise.
- Conducted comprehensive data analysis to identify trends and insights, facilitating informed decision-making processes, leading to more strategic actions.
- Implemented advanced data visualization techniques, including heat maps, scatter plots, and tree maps, to uncover trends and patterns in large datasets, leading to more informed decision-making processes.
- Developed and implemented automated data cleaning processes, resulting in a **15%** reduction in data processing time and a **20%** increase in data accuracy, optimizing data management processes.
- Leveraged advanced data wrangling techniques, including outlier detection and imputation methods, to refine large datasets, yielding a notable data accuracy and a **22%** reduction in analysis time.
- Skilled in implementing data pipelines and ETL processes using Snowflake, ensuring seamless data integration from various sources, and enabling real-time analytics and reporting capabilities.
- Utilized advanced forecasting techniques to predict demand and optimize inventory management for various parts and assemblies, ensuring efficient supply chain operations.

#### **Electronic Corporation of India Limited | IT Summer Intern**

**Hyderabad, India | Jun 2019 – Jul 2019**

- Developed embedded systems with Arduino and Python for GSM-based home automation, enhancing product functionality and reliability.
- Integrated sensors such as motion detectors, temperature, and light sensors into the automation system, improving overall system efficiency and performance.
- Conducted extensive testing and optimization to ensure reliable performance in real-world environments.
- Documented system architecture, codebase, and usage guidelines for future reference and maintenance.

## **SKILLS**

---

|                        |                                                                     |
|------------------------|---------------------------------------------------------------------|
| Programming Languages: | Python, SQL, R, JavaScript, HTML, CSS, DAX, JSON, SAP, Big Query    |
| Libraries:             | Scikit-learn, Keras, Pandas, PyTorch, NumPy, Seaborn, PySpark       |
| Tools:                 | Power BI, Alation, Excel, Tableau, Alteryx, Visio, Snowflake, Azure |
| Statistics:            | Regression, A/B testing, SVM, Random Forest, NLP, NLM, KNN, PCA     |
| Databases:             | MySQL, MongoDB, Microsoft Access, Microsoft SQL Server              |

## **PROJECTS / OPEN-SOURCE**

---

#### **Sales Forecasting: ([GitHub](#))**

**Python, Pandas, Scikit-learn, Power BI**

- Engineered a robust sales forecasting model using Python, Scikit-learn, and Power BI on the Walmart dataset, achieving an outstanding **96%** accuracy rate.
- Conducted exploratory data analysis (EDA) techniques to gain comprehensive insights into the dataset, followed by strategic feature engineering techniques to optimize model performance.
- Developed interactive Power BI dashboards for intuitive visualization of sales forecasts and trends, enabling informed strategic planning.

#### **Caterpillar's Marketplace for 3D Printable Structures: ([GitHub](#)) SQL, HTML, React, MongoDB, Trello**

- Defined project scope by writing epics, user stories and acceptance criteria for a 3D Construction marketplace for a Caterpillar project as part of my course project.
- Created a dynamic webpage and implemented a robust database for seamless integration and enhancing the user experience.
